

FRONTIER: FIRST ENCOUNTERS EQUIPMENT LISTING

JJFFE ffewin28a7.exe 4/9/2006

This table allows you to change the Buy, Sell, Weight, ID, and Display values on the Shipyard Upgrade page. The first line shows the displayed values in the game. A Display value entered on this line is the one to replace the current value, then the item will display in the game. The second line shows the hex values as entered in the program, including their reverse order. The Buy and Sell values are multiplied by 9 to get the display value in the game. The third line is the starting line address, followed by the suffix addresses which follow. For example, the address for the Weight of a KL760 Homing Missile is 07CDEB. The program will still determine what is displayed in each system as there is a limit to the number of items displayed. So adding new ones will usually require removal of current ones from the list. Note that some items, like the Transmission jammer, makes a profit when you sell it back.
