/frags	/setjoinmessage [message]
/grantdock [target]	/startas [template]
/help [page]	/time
/list	/unmute [target]
/loc	

A few Simple Mods for Freelancer

Some files may be encrypted requiring decoding or replacement to access the files. They may also be read only and require permissions to edit them. Solutions to all of these issues are readily available on the Internet.

Access Global Server List

As the Microsoft Global Server is no longer online, this modification will continue to list all the available Freelancer servers. Edit the Freelancer.ini file in the Program Files (x86)/Microsoft Games/Freelancer/EXE folder and change the following

from hostname = fllistserver.zone.msn.com ; GUN server in Redmond (DNS entry)

To   ;hostname = fllistserver.zone.msn.com ; GUN server in Redmond (DNS entry)
      hostname = gun.fllistserver.com ; www.fllistserver.com

Remove Startup Videos

Edit the Freelancer.ini file in the Program Files (x86)/Microsoft Games/Freelancer/EXE folder and add a semicolon to the front of these lines of code as follows:

;movie_file = movies\MGS_Logo_Final.wmv
;movie_file = movies\DA_Logo_Final.wmv
;movie_file = movies\FL_Intro.wmv

God Mode (Invincible)

God Mode only works in Single Player. It can be left in place as Multiplayer servers override this value. Edit the PerOptions.ini file in the My Documents/My Games/Freelancer folder and change the following

from DIFFICULTY_SCALE=1.00   to DIFFICULTY_SCALE=0.00

Increase Cruising Speed

Cruising Speed only works in Single Player. It can be left in place as Multiplayer servers override this value. Edit the constants.ini file in the Program Files (x86)/Microsoft Games/Freelancer/DATA folder. Search for the [EngineEquipConsts] section and insert the following BELOW the line CRUISE_ATTEN_MOD_RANGE =

CRUISING_SPEED = 1000

Your Cruising Speed will now increase from the default of 300 to 1000. Try different values to find your desired speed.
